TECHNICAL SKILLS

JavaScript, Ruby, Node, C, jQuery, Python, TypeScript, Rails, React, Redux, Thunk, WebPack, Linux, Babel, NVM, NPM, Yarn, JSON, Express, NextJS, Git, CSS, HTML, styled-components, Tailwindcss, Sass, SCSS, bootstrap, MUI, Firebase, MongoDB, SQL

SUMMARY

Experienced Full-Stack Developer, excelling at JavaScript, NextJS, and React. Published by JavaScript in Plain English for demonstrating S.O.L.I.D Principles with JavaScript.

EXPERIENCE

Genesis Iron works, Remote - Software Engineer,   *June 2021 - July 2021*
- Using NextJS framework, constructed an entire website with 8 pages and adaptive routes for team members.
- Collaboration with IT and design teams.
- Deployed application with continuous integrations to test code before each deployment.

Beach Coders, Remote - Lead Developer,   *July 2021 - Present*
- Teach from one up to five, 2.5-hour part-time classes per week, for 4 weeks.
- Built customized projects and lessons plans in every 1on1 private training.
- Lead 5 students to a final project customized to their learning styles.
- Improved communication using discord and live share with VS Code to gain optimize class time.

USC - Short Path, L.A. - *Developer / co-founder*   *May 2021 - Present*
- Saved time spent in development by 200hrs by implementing S.O.L.I.D principles and Agile workflows.
- Optimized and designed infrastructure/systems architecture, over 5 months of communication and collaboration.
- Configured Tailwindcss with styled components, Daisy UI and theme-changing, 80% reduction for MVP design.
- Structured and documented website layouts wrapping 8+ pages.
- Instituted easier SEO with API Data for 100 or more dynamic pages.

PROJECTS

Portfolio - GitHub | Website
Personal portfolio website
- Reduced development by 50 percent with the package runner create react app.
- Integrated Material-UI library, UX/UI, deployed and hosted projects using Heroku CLI, Surge, and Netlify.

Next-Connect - GitHub | Website
Social Networking (SPA) app
- Implemented User Authentication, managing user data with Redux & Thunk.
- Used React to create dynamic routing.
- Updated Website 2.0 over to NextJS for CEO and Tailwind for better UI and responsive design.

Education

CS50's Computer Science, Online - CS50,   *Jan. 2021 - May. 2021*
- How to think algorithmically and solve programming problems efficiently.
- Deep Learning on algorithms, data structures, encapsulation, software engineering, and web development.
- Familiarity in a number of languages, including C, Python, and JavaScript plus SQL, CSS, and HTML.

Flatiron School, *Online - Software Engineering*   *Feb. 2020 - Jan. 2021*
- Participated in a cohort of Software Engineer intensive full-stack web development program.
- Studied core software engineering curriculum for a combined 2000+ hours. Learning OOP, MVC, ORMs, and core CS principles that utilize industry best practices like T.D.D, Fail Fast, and Modularity.
- Studies included JavaScript libraries and frameworks like React, Redux, and Ruby on Rails.
- Engineered 5 projects with 2-3 week strict deadlines for large-scalable web applications and CLI's.
